

# Rain screen panels

## Product description

### Ruukki RSP600

Ruukki offers a versatile selection of facade cladding. Ruukki RSP600 are made of enhanced weather-resistant metal sheets bent at all four sides. Ruukki RSP600, together with the range of accessories, form a complete system of rain screen panels with accurate dimensions and provide high quality finish of the facade.

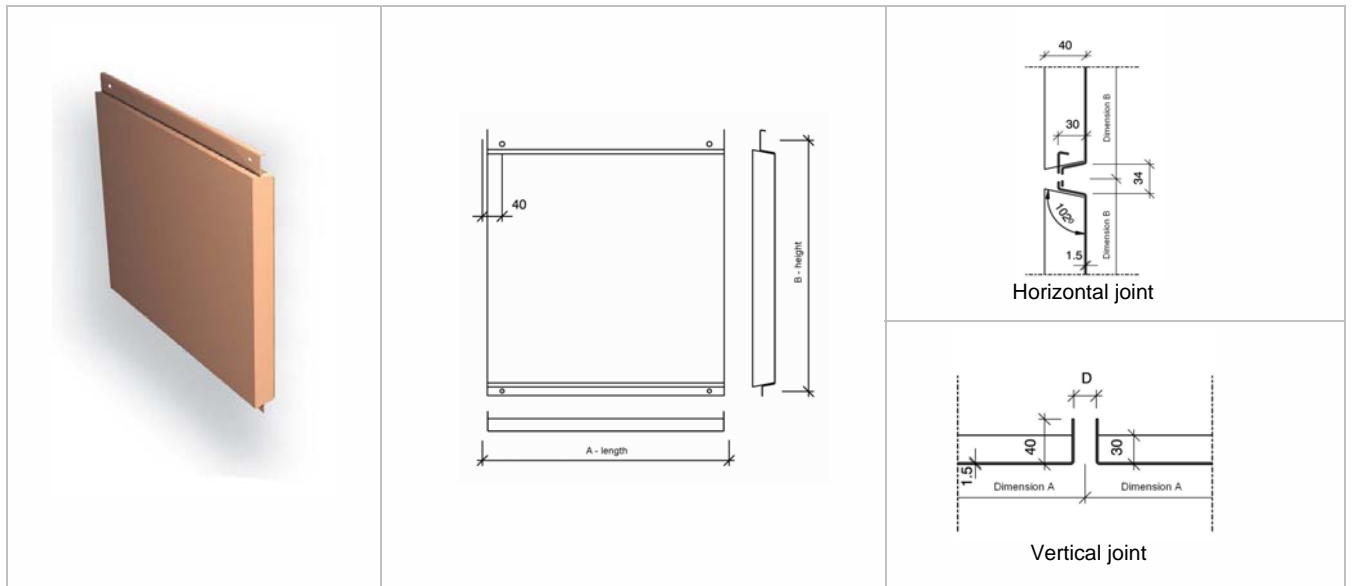

Ruukki RSP600 are always designed according to the project-specific dimensions. There are recommended sizes for the cassettes. The cassettes have three dimensions: width, height and depth. The width of vertical joints must also be specified in the order.

Ruukki RSP600 are available with visible fixings. Special rain screen panels, such as corner, are also available.

### Product applications

- office buildings
- public utility buildings
- industrial halls
- warehouse halls
- renovations

Ruukki is a metal expert you can rely on all the way, whenever you need metal based materials, components, systems or total solutions. We constantly develop our product range and operating models to match your needs.

- **Product**
